

# Business / Banking Trade Operations

To enter in the PPP program, need:

☆ KYC for PPP.

☆ Verbiage MT760

The MT799/MT760 or MT542 would be provided within the 72 hours after contract signatures.

The schedule of operation is:

1) Monetization (7 banking days):

LTV = 80%

With sharing:

- ↳ 40% for the monetizer
- ↳ 10% intermediaries' monetizer
- ↳ 40% investor
- ↳ 10% intermediaries' investor

This is the sharing for all operation.

2) Bullet before PPP

Before the PPP a bullet program has made with a profit from 400% to 800%.

From 1 to 3 times before the 40 weeks program PPP

We can not say how much we could make bullet because the program bullet is not strict.

It is function of the possibility because bullet is not trade program.

# Business / Banking Trade Operations

## 3) PPP trade

After 8 weeks maximum of bullet we enter in 40 weeks trade PPP program.

That means PAYMENT all weeks for 20-40% of result weekly depending of the opportunity of trade.

That means from 80% to 160% result monthly.

This for 40 weeks.

**THE LTV IS 80%**

**WITH THE CASH, WE GO ON TRADE!**

The sharing of all performance is:

- 40% for the client
- 10% for the client's consultants and intermediaries
- 10% for the platform trading
- 40% for the monetizer & trader

The client is the investor.

He gives the instrument. The instrument is not Money.

The consultants & intermediaries make all necessary to explain and facility the client to go in trade.

The platform is the central ingenuity to do all of that.

It got lawyer, BO, trader, monetizer, accounts, etc...

Monetizer & trader are hard workers to make profits.

The profit is due to their works and they are the base of the trade.

This is the logic of this operation.

We remind you that opening a file with us must necessarily obtain the validation of our compliance service managed by Covaxan.
